*Dear Human Resources Team,*

*I finished my University studies in Master Electronics in University of Valencia. My master thesis was a system for the supervision and monitoring applied to tele-home care focused to people with dependency problems in their own homes, obtaining the maximum qualification possible.*

*I have worked two months in University of Valencia as a laboratory technician, where I designed schematics and PCBs with Orcad, programmed microcontrollers in C and built interfaces in Labview.*

*Since September 2015 I am living in Austria, studying German and working in IKEA to learn the language quickly. My next step is to get a job as engineer where I can improve my skills and make every day a challenge to learn something new, and I want Japan to be that place. I was learning Japanese in Spain for 4 years and now I am continuing self-taught.*

*I work hard and pay attention to all little details. I consider myself like a person with a lot of ideas, ready to help, share and learn from others. I have a restless mind and I like to learn new skills and improve them.*

*Thank you for taking the time to consider me for this application and I will look forward to hearing from you in the near future.*

*Yours sincerely,*

*M<sup>a</sup> Patricia Martín Soriano.*
